✓ **FREE Upgrades**

Keep your software up-to-date and ready for the next big trading opportunity. Owners of **OptionGear** will have access to enhancements that improve the speed and functionality of your software.

OptionGear...

1 **Analysis View**

From one easy to read page, compare all put and call prices for your particular stock. Use this table to quickly select and contrast those options most suitable to your strategy.

2 **Create & Price Positions**

Simple and complex multi leg option trades can be created and regarded for their relative profitability while simultaneously checking to see how the option price compares to fair value models.

3 **Position Information**

Trade details, including profit and risk as well as the Greeks, are all vital for any option trader. Listed below the pay off diagrams, this information is summarised and perfectly accessible.

4 **Risk Curves & Price Charts**

A visual representation of a trade's risk and reward can be a highly efficient way of analysing the likely success of a strategy. When combined with a price chart, the analysis becomes even more clear, especially as multiple strategies can be compared simultaneously.

5 **Point & Click Analysis Pallet**

Represents a dynamic feature to clearly and visually select the optimum trade performance. This can be done across differing volatilities and days to expiry for any option trade selected in the risk curve or price chart screen.

The Trading Profits Enhancer

OptionGear is a sophisticated real-time options analysis and trading program, designed to help you identify the most profitable options strategies through its scanning and searching capabilities.

The screenshot displays the OptionGear interface with several key components:

- 1**: A table of options contracts with columns for Calls and Puts, including Bid, Ask, TV, and Cnts.
- 2**: A table of transactions with columns for Date, Action, and Type.
- 3**: A table of trade statistics with columns for Avg IV, Call IV, Put IV, P/C Ratio, Date, Days, Price, IV Chg, Forecast, Profit/Loss, and Delta.
- 4**: A volatility smile graph showing the relationship between strike price and implied volatility.
- 5**: A candlestick price chart with a 'Long Straddle' strategy overlay.
- Strategy Wizard**: A pop-up window for defining search criteria, including fields for Symbol (IBM), Market (NYSE), Volatility, Use (Calls and Puts), and Ranked by (Cost).

Strategy Wizard

The Strategy Wizard allows users to quickly view trades that match a particular strategy that you define.

Simply enter your parameters and **OptionGear** will devise and display the trades that meet your criteria. All you have to do then is decide if you want to take the trade – it's that simple!

The Strategy Wizard interface includes the following elements:

- Enter a Symbol: NYSE
- INTERNATIONAL BUSINESS MACHINES
- Max Risk: -1176.596
- Buttons: Basic, Advanced
- Strategy Selection: Long Call, Long Put, Bull Call Spread, Bear Put Spread, Butterfly, Calendar, Straddle (each with a 'Go' button)
- Market: Any
- Volatility: Any
- Use: Calls and Puts
- Ranked by: Cost
